Recycling at Home

Recycling at Home

Use the activities to practice and provide a basic understanding of the process of recycling in the home. You can of course, develop this naturally at home each day, by reinforcing which bins to use for which type of rubbish.

If you do take photos, please share them with us by uploading them to Class Dojo.

Support Activity

Print out the pictures on the following pages, cut out items (no need to be precise!) and use these as a sorting activity.
